

WASTE DISPOSAL IN VRČEŇ

MIXED WASTE:

A mixture of household waste that remains after maximum separation.

CONTAINERS (brown, green, white, orange ...) on the village square:

- **Glass** : white and colored glass
- **Paper**: newspapers, magazines, exercise books, books, writing and wrapping pape, carton etc.
- **Tetrapack**: cartons - packaging of juices, milk, wine, etc.
- **Metal** : small metal waste
- **Textile**:
- **Cooking Oils**: from January 2020 there will be a special container designed for cooking oils. Put the oils in a PET bottle and then place them in a collection container.
- **Organic waste**: composting preferred, organic waste containers
- **Plastics**: **The yellow container placed on the village square is not intended for plastic-bag collection! Collection of plastics is done in a way of collective system every 2-3 months.**

If the container is full, then it is necessary to wait for its emptying, the waste does not belong next to the containers !!!

COLLECTIVE WASTE COLLECTION SYSTEM:

- **PLASTICS** : every 3 months on the village square, put in the bag, this includes:
PET bottles, plastic foils, bags, plastic bags, packaging for dry goods, yoghurt cups, plastic toys, buckets, flowerpots, etc.
- **DANGEROUS WASTE**: 2 times a year in the municipal office area, this includes:
Drugs of all kinds, paints, soiled plastics and paint cans.
Fluorescent lamps, televisions, monitors, radios, washing machines, printer cartridges.
Refrigerators, stoves, boilers; batteries and car batteries, motor oils, brake and antifreeze fluids, chemicals, tires.
- **LARGE-SCALE WASTE**: Furniture, mattresses, garden furniture, linoleum, plastic pipes, plastic containers of chemicals, bags of building mixtures etc.
